Education

University of Waterloo — Bachelor of Computer Science

September 2022 - April 2027

Relevant Coursework: Algorithms, Data Structures, Statistics

Skills

Languages: Python, JavaScript, TypeScript, Swift, HTML/CSS, SQL, C, C++, Java, C#

Technologies: React, Node.js, Express, MongoDB, Git, Firebase, Selenium, Linux, Flask, .NET

Experience

Fidelity Canada — Software Engineer Intern

Toronto, ON | January 2024 - April 2024

- Led the development of a document compliance screening tool using **Python, SQL, AWS S3** and **OpenAI's GPT-4** to process **600+** files every month
- Spearheaded the revamp of a fund fact-checking tool by optimizing database queries to reduce redundancy in the codebase and deliver a faster user experience by cutting runtime by over **60%**
- Bolstered the infrastructure by patching critical bugs and developing end to end test suites for various user flows using unittest, achieving 90% code-path coverage

Hatch — Software Developer Intern

Oakville, ON | May 2023 - Aug 2023

- Deployed a PDF chatbot **MERN** app that utilizes semantic search to accurately interpret user queries and contextual information, reducing average manual search times by **70%**
- Built an intuitive UI in **TypeScript** using **React** and **Tailwind CSS** featuring file uploading and a real-time chat window for users to engage in conversations with the uploaded PDFs
- Powered the chatbot using GPT-3.5 and integrated **MongoDB Atlas Search** to cut query processing time by **25%**

Hatch — Software Developer Intern

Oakville, ON | July 2022 - Aug 2022

- Utilized parallel programming in **Python** to reduce the runtime of time-sensitive functions by **87.5%**. Ensured thread safety and prevented data corruption by implementing synchronization mechanisms
- Developed a dynamic Tkinter GUI in Python to streamline the usage of a smelting calibration tool
- Crafted informative visualizations using Matplotlib reducing manual data interpretation time by **55%**

Projects

FiTracker

github.com/ShiftyTS/FiTracker

- Developed a **MERN** stack web application that allows users to create accounts and track their past workouts
- Built frontend using React and Tailwind CSS to establish a modern UI that adapts to different viewport sizes
- Created a **RESTful API** backend using Node and Express and stored user and workout data in MongoDB Atlas

ForTwo

github.com/ShiftyTS/ForTwo

- Created a daily question-answering activity iOS app for couples to learn more about each other
- Designed a dynamic **SwiftUI**-based UI for real-time user interaction and question response viewing
- Implemented secure user authentication using **Firebase Authentication** and integrated **Cloud Firestore** for efficient data storage and retrieval
